We should judge from the above ver-on of the Bishop's remarks that he pitched his key at least a trifle milder at at Weston than at St. Alphonsus school house in this city. There is cer tainly nothing in the tone of his remarks as above reported to find fault with. If we were a Bishop and wanted to make an impression upon an unbelieving public we would adopt this tone as our general style, and discard the ipse dixit and exathedra tone that too often characterizes

that he is not hostile to the Bible in the retaining it there. Furthermore, he time he would not patronize such public schools. Why? Because "Catholics could not send their children to be taught

None of these kind of schools suit the ideas of the Catholic heirarchy, and they godless or heretical schools.

They want schools where they can in culiar and distinctive tenets of their own faith. Not only the general precepts of religion are to be taught but the doctrinal points held by Catholics, including the traditions of the church. They are opposed to any other kind of schools. These are the schools they have to-day in Spain nently Catholicised in her education. And yet out of fifteen millions of are not remarkable for their picty. point therefore that we make by way of exception to the point that Bishop Kain endeavors to make against the put lie schools, is that he can not point to his parochial system in Catholic countries and say, "Look here: see how intelligent and virtuous these people are." If his system will not bear legitimate fruit in countries like Spain, where the machinery of the law is under the control of the clergy, why should we adopt

In Ohio county I have conversed with many men of both parties, and have I found the usual divisions in the Democratic ranks, which always occur when they have a seemingly clear field. The party seems to be pretty evenly divided between "Dad" and "Andy," but whenever I talked with a Republican I found he was "Andy" all the time. If I

whenever I talked with a Republican I found he was "Andy" all the time. If I were a prophet I should predict that Ohio county will give Wilson a large majority, at least that is the way the talk of the people strikes me. In Brooke county, as between the two candidates, the tide of feeling does not run high. Voters say that it is Ohio county's fight, and they don't care who wins. In the town of Wellsburg itself, the political skies are more clear and opinion is more defined, the Democratic regulars prefering a staunch old liner over a raw young sprig whose years as a Democrat

I had some conversation with the engineer, Mr. J. M. He thinks that in two years the road will be finished, laid with a double track, and running. The general appearance of be finished, hid with a double track, and running. The general appearance of the survey and the staking does not look to me like business, as it lacks an appearance of earnestness. Some of the stakes are mere chips driven into the ground a few inches. I think the farmers along the proposed route had better hold on to their pocket books until more substantial evidences of a real live intention to build the road are given. I observe that the Pike road down Buffalo is section. To the Editor of the Steubenville Garette:

As a misunderstanding has arisen between some of the stockholders of the Wheeling & Lake Erie Road and the officers, will you allow me to correct this impression, as many of them claim that twenty-eight miles of the road were to be linished before the stockholders should pay any money. The terms of the contract between the directors and H. B. Willson and Andrew I. Park, were they, the contractors should grade twenty.

Willson and Andrew I, Park, were that they, the contractors, should grade twenty-eight miles before the company paid them any of the local subscriptions.

This had nothing whatever to do with the stockholders paying their instalments as called for by the board, under the Statute Laws, governing incorporations, and is not a condition in the books of subscription to the company. The discretors are asking nothing unreasonable.

Now that the work is to be pushed they ask that the instalments be paid regularly, 10 per cent, monthly. Should there be any unreasonable delay on the part of any one, the collectors are authorized to make out the accounts and place them in the proper officer's hands for collection, with interest from August 20th, 1874. If paid prography under the sunplemental paid promptly under the supplementa call no interest will be charged.

Last evening the celebrated monster grapevine of Santa Barbara arrived on board the steamer Mohongo, boxed up in seven large boxes for shipment to the Philadelphia Centennial Exhibition, by request of our State Centennial Commissioners. The enormous proportions and unequaled fruitage of this wondrous vine bears made its fone swell-wise. Its follows unequaled fruitage of this wondrons vine have made its fame world-wide. Its foliage covered 10,000 square feet, bore six tons of grapes annually, and is from 60 to 100 years old. Eight feet from the ground it is five and a half feet in circumference. It branches out into twenty large limbs, at that height, and one of these limbs is twenty-seven inches in circumference. This limb is the exact size of the Queen of England's celebrated Hampton Court vine, which is the largest in all Europe. The Santa Barbara vine will be promisent among the curiosities at the Centennial, and of immense value to California by attracting the attention of the world to the wonderful productions of our soil and climate.
